Experience

Software Engineering Intern (Kernel-Transactions) *Ottawa, ON*

SHOPIFY *September 2017 - December 2017*

- Participated in a large project to overhaul the financial transactions and payments processing data models to unlock new business opportunities for Shopify.

Web Developer *Waterloo, ON*

WILFRID LAURIER UNIVERSITY *July 2015 - August 2017*

- Designed and developed new features for a Student Success Center web application, increasing the ease of use for staff and students.

Software Engineering Intern (Kernel-Transactions) *Ottawa, ON*

SHOPIFY *January 2017 - April 2017*

- Improved merchant experience by implementing resiliency in financial transactions, allowing Shopify to automatically recover from unexpected events (outages, bugs, etc).
- Reduced support debt by automating a manual process to adjust a merchant's Shopify Payments balance.

Solutions Developer (Co-op) *Kitchener, ON*

TD LAB *Jan. 2016 - April 2016*

- Developed iOS, Android, Web, Augmented and Virtual Reality, and Hololens based projects for The Bank.

Software Developer (Co-op) *Kitchener, ON*

CRAWFORD & COMPANY *Jan. 2015 - May 2015*

- Developed a full-stack web application to modernize the organization's IT ticketing process for both employees and help desk agents.
- Created a realtime, interactive user notification system using SignalR.

Projects

uPark *Java, Swift*

KRISPENNEY.ME/UPARK *April 2016 - Present*

- Created an Android application to display student parking information at the University of Waterloo, avaliable on Google Play.
- Technologies used: Java, Swift, HTML, CSS

FCAlertView *Swift*

GITHUB.COM/KRISPENNEY/FCAlertView *August 2016 - Present*

- Created a customizable alert view library for iOS, written in Swift.

Personal Website *HTML, SASS, Javascript, Jekyll*

KRISPENNEY.ME *September 2014 - Present*

- Designed and developed a personal website, now in it's third iteration.
- Implemented a modular development process using SASS and Jekyll to ensure simple maintenance.
